

Chairman Mott's request of Committee and MSO working group

1. Review manure storage ordinance-- *what is good and protective and what could/should we strike?*
2. Review comments received-- *written comments have already been distributed to Committee members and can also be found at: <https://www.oclw.org/manure-storage.html>. Verbal comments can be reviewed at minute mark 24:24 on the public hearing recording (at above link).*
3. Review the Right to Farm Law (included in John Sweeney's written comment)-- *how it impacts the manure storage ordinance and our ability to protect water. How does a MSO and the Right to Farm Law mesh? The Right to Farm Law has been sent to Corp. Counsel for review.*
4. What type of adjustments can be made to the ordinance? *Ask ourselves what needs to be in place for 100-499 animals? As Supervisor Roach asked: "how are we not protected from State law if a large farm comes in?"*
5. Review Paul Daigle comments.

Overarching questions:

Is the State already doing enough? Look at left side of document titled "state regs. v. oneida cty proposed"

If not, what needs to remain in our ordinance to protect Oneida County waters? Right side of document titled "state regs. v. Oneida cty proposed".
