

Prohibitions Already in State law

- A livestock operation shall have no overflow of manure storage facilities. NR 151.08
- A livestock operation shall have no unconfined manure stack in a water quality management area (this includes sites that are susceptible to groundwater contamination or that has the potential to be a direct conduit for contamination to reach groundwater, the area within 1000' of the high water mark of navigable waters that consist of a lake, pond, or flowage, or the area within 300' from the ordinary high water mark of navigable waters that consist of a river or stream). NR 151.08
- A livestock operation shall have no direct runoff from a feedlot or stored manure into the waters of the state. NR 151.08
- A livestock operation may not allow unlimited access by livestock to waters of the state in a location where high concentrations of animals prevent the maintenance of adequate sod or self-sustaining vegetative cover. Properly designed, installed, and maintained livestock or farm equipment crossings are exempt. NR 151.08

Proposed Setbacks Specific to Oneida County

- Manure storage facilities or manure stacks of any size may not be located:
 - within 100' of any property line
