

# Yellow Iris Harvesting- Lake Tomahawk Landing

June 14<sup>th</sup>, 2022

Oneida County Staff in Attendance: Madeline Hetland and Aubrey Nycz

Report by: Madeline Hetland, AIS Project Assistant

Aubrey and I went out to the Lake Tomahawk boat landing on Town Bay Road off of 47 to pull out some yellow iris growing on the shoreline. There were plants on both sides of the dock and down the beach. We pulled out most of the plants on the right hand side and on the beach, but removing the ones on the left would have caused erosion issues because they were right on the water. We left those there and plan to revisit the site to remove those plants once we have native plants to put in place of the yellow iris plants. We pulled about 20 plants from the site.
